The screenshot shows the Postman application interface. On the left, there's a sidebar with sections for Collections, APIs, Environments, Mock Servers, Monitors, Flows, and History. The 'Collections' section is currently active, showing a list of collections including 'Meetings RESTful API Examples' and 'Phase3_Api'. Under 'Phase3_Api', several endpoints are listed: POST addProduct, DEL deleteProduct, PUT updateProduct, PUT editUserPass, GET getAllUser, GET getAllProduct, GET getById, GET getBySeason, GET getByBrand, GET getByCategory, GET getByPriceOrderASC/DESC, GET getByColor, GET getLatestProductByDate, POST addPurchaseDetails, GET getAllReportByCategory, and the selected endpoint, GET getAllReportByDate. The main workspace shows the configuration for the 'getAllReportByDate' endpoint. It's a GET request to 'http://localhost:8082/PurchaseReport/getAllReportByDate'. The 'Params' tab is selected, showing a single query parameter 'Key'. The 'Body' tab is also visible. Below the request configuration, the response is displayed in a JSON tree view. The response body contains two objects, each representing a purchase record with fields like purchase_id, username, brand, color, purchasedate, mobile, and category. The status bar at the bottom indicates the response was successful (Status: 200 OK), took 31 ms, and had a size of 1.75 KB.
